

Donate Blood for Research

If you are interested in donating or would like to learn more, please email us at DonateforResearch@BloodworksNW.org

Systemic Lupus Erythematosus (SLE)

BLOODWORKS IS SEEKING VOLUNTEERS WHO HAVE BEEN DIAGNOSED WITH SLE TO DONATE BLOOD FOR RESEARCH.

Help scientists advance medical treatment and diagnostic options.

Bloodworks Northwest is partnering with a research study to learn more about Systemic Lupus Erythematosus. Your donation will provide medical researchers with the critical blood components to advance the development of potentially lifesaving and life-changing diagnostic tools, therapies and treatments. Participation in this program is not a treatment, and it will not result in any direct health benefit.

With more than 70 years of Northwest history sustaining the community blood supply, donors are assured that their donations will be safely performed by our knowledgeable staff under the direction of a physician—meeting the highest regulatory standards. Donating a blood sample for research is a way to help others, and to give back to your community.

Easy steps to donate:

Complete donation form

A Bloodworks Coordinator will contact you
