Street:
City, State, ZIP:
Comments:

## LABELING SAMPLES

All samples must be properly labeled and information must agree with the identification on the RFT.

- If a specimen is identified by name, there must also be a numeric identifier which may include Hospital number, birth date, or other coded identifier.
- If only a numeric identifier is used (with no name), the number must be a Hospital number or coded identifier. A birth date is not acceptable in this circumstance.
- A draw date should be on the sample but the sample will still be accepted if the draw information is on the RFT.

GENERAL SAMPLE REQUIREMENTS
Complete information on sample requirements (type, volume age and storage requirements), test descriptions, scheduling and reporting can be found at https://www.bloodworksnw.org/labs/tests.

CONFIRMATORY TESTING
Confirmatory tests are automatically added to the request and performed at an additional charge if the screening test for HBsAg, Syphilis by RPR, anti-HIV-1/HIV-2, anti-HTLV-I/II, or T.cruzi is reactive (unless otherwise indicated on the RFT).

For any questions, please call the laboratory (425-656-7907, or 800-406-4397) or visit http://www.bloodworksnw.org.
